

WS 25/26 Machine Learning Challenge

Deadline 01/19/26

Task:

- Classification (AI generated – base model, AI generated – finetuned, human)
- 3 Classes (0 : human, 1: AI-finetuned, 2: AI-basemodel)
- 1000 samples, we hold back 5 %

Format:

- Three column .csv format
- Use , as separator

Rules:

- Outperform our baseline model!
- Your model will be evaluated on the unknown samples which will be released later
- The hold-back data will only contain the inputs (e.g. the samples only, not the classification)

Submission:

- Your submission should contain
 - o 1) your python code (.py scripts or jupyter notebook)
 - o 2) a separate .csv file with your classifications of the hold-back data
- Put all your files into one .zip Archive with your Name(s) and send them via Email

We will provide:

train.csv: This is your starting point, on which your models should be trained

id	samples	label
164	@robreiner He's not going to jail.	1
...	...	...

holdback.csv: Will look the same, but without the "Sentiment" column

id	samples
535	@AbrahamHamadeh Abraham is a Republican?
...	...

You will submit:

`predictions_{name}_{matrikelnummer}.csv`

Should contain the id and the Classification. **Check if it can be read by the provided `format_checker.py` script! Submission files that do not go through the format checker will be counted as not submitted!**

id	label
199	2
...	...

IMPORTANT INFO:

- 1) Submit to werners@uni-trier.de
- 2) Submission after the deadline will not be checked
- 3) Use the updated `format_checker.py` Script!
- 4) Submissions should be less than 10 MB
- 5) Make sure your names and "Matrikelnummer" are included!
